iOS 7

Quit multitasking apps

THE NEW MULTITASKING view is a clear improvement but it's not instantly obvious how to close the apps.

To quit apps, double press the Home button, then swipe up on any of the screenshots until it leaves the screen. You can even close more than one at a time by using multiple fingers and swiping up on more than one screenshot.

iOS 7

Infinite folders

FOLDERS ARE OFTEN used to place similar apps together but you were limited by how many apps you could place in each one. With iOS 7 you can now place as many apps as you want inside a folder. Once you select a folder you'll see the first nine apps and will have to swipe to find more. While it's great being able to have your games in one place, it may become hard to find them again, which is why the next feature will come in handy.

Check App Size And Delete

IF YOU FIND that your iPad is running out of storage, it might be useful to know what's taking up all the space.

Open *Settings*, tap *General*, and then *Usage*. This shows you all your apps and their size in descending order.

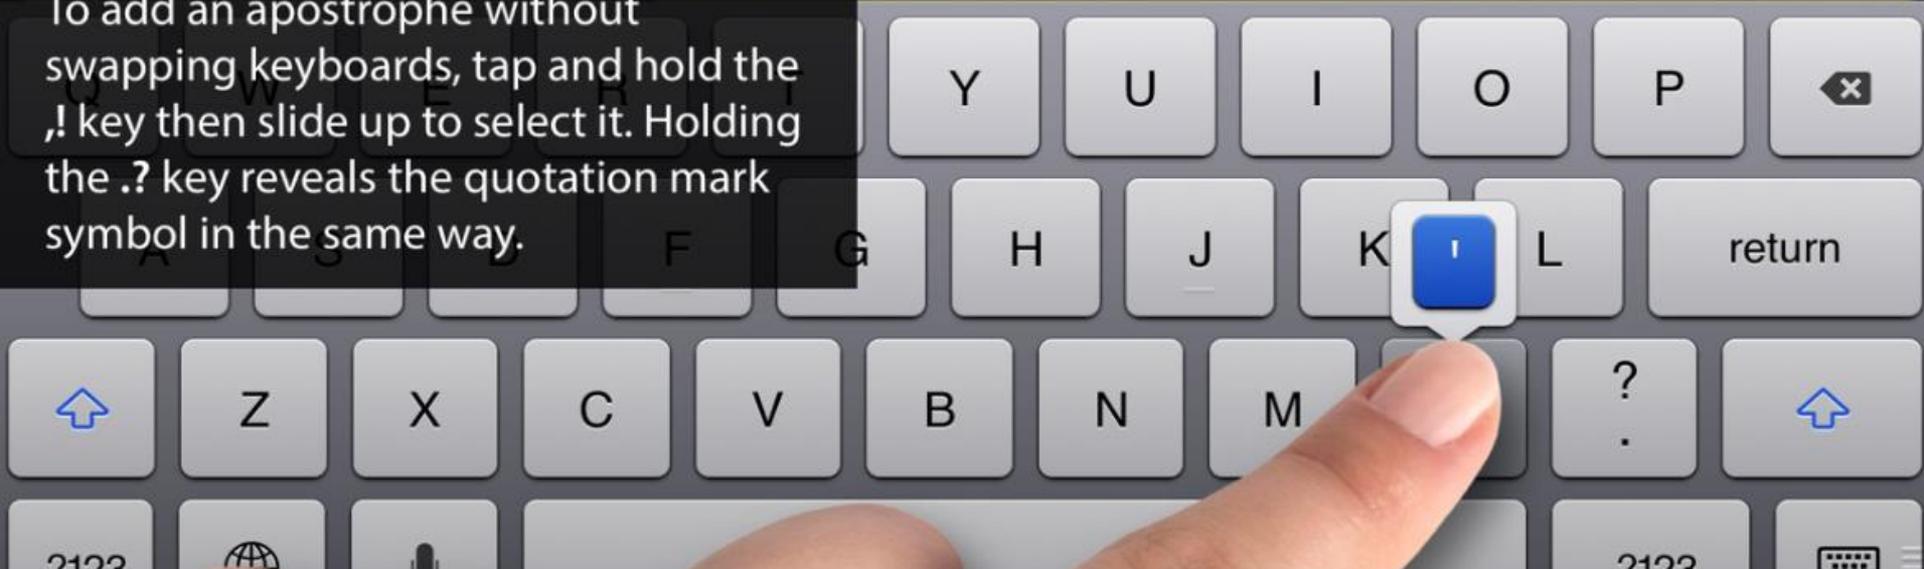

To delete an app, first tap the app listing to see a summary, then tap *Delete App*.

Find That Apostrophe

THE KEYBOARD ON the iPad has all the functionality of a normal keyboard. However, there is still not quite enough space for an apostrophe on the main keyboard.

To add an apostrophe without swapping keyboards, tap and hold the **,!** key then slide up to select it. Holding the **.?** key reveals the quotation mark symbol in the same way.

Take A Screenshot

TO TAKE A screenshot, just press the *Home* button and the *Sleep/Wake* button at the same time. The iPad screen flashes white and plays a camera shutter sound.

The image will be saved in the *Photos* app, in the **Saved Photos** album on iPad 1, and in the **Camera Roll** album on iPad 2 or later.

- ▶ **Kwikset Kevo** a Bluetooth-connected deadbolt door lock that pairs with Apple's iPhone to make fumbling with house keys a thing of the past.

- ▶ **Withings WiFi Scale** track your weight and body composition including variations in fat-lean ratio and Body Mass Index, all automatically uploaded to your iPhone and iPad.

- ▶ **Dropcam** is a high-definition Wi-Fi video camera with remote viewing and two-way sound for your home or business.

- ▶ **iGrill** gives you peace of mind that your food will be perfectly cooked, at target temperature and safe for consumption. iGrill communicates with your iPhone, iPod, or iPad via a secure, long-range Bluetooth connection.

- ▶ **Nest** Learning Thermostat and Smoke & CO Alarm. Thermostat turns itself down when you're away, and can be controlled over Wi-Fi. Protect gives you a heads-up by speaking in a human voice.

Way Cool Accessories

- ▶ **Egg Minder** If you were going to put all your eggs in one basket, you'd want it to be this one. Part of the Quirky + GE line of products, the Egg Minder tells your Wink app the number of eggs left in your tray, and when the oldest one got there. You can check your egg tray while you're at the store, so you'll never be in a scramble for a good egg again. A light sensor detects when you open the fridge door, and an LED light highlights the oldest egg. Now that's over-easy!
